

COVID Health & Safety Precautions

Safety is our utmost priority at Greater Pittsburgh Community Food Bank. As a result of increased transmission of COVID-19 in our entire service area, the Food Bank requires Food Bank staff and volunteers to mask while carrying out indoor activities. Volunteers must wear a mask or facial covering that fully covers their nose and chin at all times, regardless of vaccination status. Masking is required at all times unless you are eating or drinking. We ask that any volunteer or guest stay home if experiencing any symptoms or if you have been exposed to COVID-19.

These measures have been put in place to keep our volunteers and staff safe, and to ensure we are able to continue engaging the community in the work of the Food Bank during these uncertain times. We are grateful for your understanding and your cooperation.

The Food Bank has implemented many precautions to reduce and mitigate the spread of COVID-19 within our facility and to keep our recipients, volunteers and staff in good health. The Food Bank performs contact tracing when we are notified of an individual who has tested positive and has been onsite in our buildings. Upon each reported positive case, contact tracing is performed and individuals who had close contact with the positive individual are notified.

If you have tested positive for COVID-19 and have been at the Food Bank within 48 hours of experiencing symptoms or a positive test, please immediately notify a member of the volunteer team so we can initiate appropriate contract tracing. In addition, please do stay home if you are experiencing any symptoms or if you have been exposed to COVID-19.

Please contact a member of the volunteer team if you have any additional questions. You can reach the team by email at volunteer@pittsburghfoodbank.org or by phone at 412-745-7600.
